

### Gifu Prefecture Mountain Grading

#### Grading of Difficulty Level by Climbing Route in the No-snow Season and Under Favorable Weather Conditions

Created by Gifu Prefectural Government Cooperation from: Gifuken Sangaku Renmei, the Gifu Japanese Alpine Club, the Gifu Accident Prevention Association for the Northern Alps, the Accident Prevention Association for Mount Ontakesan, the Accident Prevention Association for Mount Nishitakadake, the Accident Prevention Association for Mount Ennasan, and the Accident Prevention Association for Mount Hakusan.

The major climbing routes (75 routes) in Gifu Prefecture are graded in terms of climber fitness level and trail difficulty level. Climbers assume responsibility for their personal safety when climbing mountains. Choose a mountain that matches your abilities. Before climbing, thoroughly check the routes, weather, hazard areas, and shelters, prepare proper equipment, and submit a mountain climbing notification form.

**Notes regarding fitness level**

- \*1 The fitness level required for this route is 4 to 5 (suitable duration: one night or more). Note that since the route has no huts or tenting sites for staying overnight, some climbers may not be able to get down the mountain before sunset.
- \*2 The fitness level required for this route is 7 (suitable duration: one to two nights or more). Note that the route only has one hut and tenting site for staying overnight (Kitanomata Shelter Hut).
- \*3 The fitness level required for this route is 10 (suitable duration: two to three nights or more). Note that the route only has one hut and tenting site for staying overnight (Gomadaira Shelter Hut).
- \*4 This route involves taking the Shinhotaka Ropeway. Check the ropeway timetable in advance so that you can create a manageable climbing plan.
- \*5 This route is located on an active volcano or a mountain near an active volcano. Check for volcano information before climbing these mountains.
